System Version: v2.4 (Enterprise Edition)

Target Roles: Super Admin, Branch, Franchise, Customer

Date: September 2026

International Courier Booking & Logistics ERP System

Official Comprehensive User Manual & Operations Guide

1. Executive Summary & System Overview

The **International Courier Booking & Logistics ERP System** (Courier Syndicate) is an end-to-end web-based logistics, shipping management, and customer portal application. Designed for multi-branch courier organizations, franchise partners, and direct customers, the system streamlines the full lifecycle of international express shipping — from dynamic rate estimation and KYC compliance to automated air waybill (AWB) barcode label printing, customs documentation, tracking timeline updates, and financial wallet accounting.

Key Capabilities

- **Multi-Role Access Control:** Tailored dashboards for Super Administrators, Branch Managers, Franchise Operators, and Customers.
- **Prepaid Wallet Ledger System:** Real-time balance deductions upon shipment booking with admin payment proof approval workflows.
- **Automated KYC Compliance Workflow:** Submission and verification of personal (Aadhaar, Passport, PAN) and commercial (GST, Trade License, IEC) documents.
- **Dynamic Rate & Tariff Matrix Engine:** Automated shipping cost calculation based on volumetric weight, destination zones, courier partner, fuel surcharge, and custom charge types.
- **AWB & Label Generation:** Instant generation and printing of Air Waybills with barcodes, Commercial Invoices, and Customs declaration forms.

- **Real-Time Parcel Tracking & Timeline:** Public & internal tracking system with movement stage updates, delivery verification, and automated idle tracking notifications.

2. System Architecture & Roles Matrix

The application enforces role-based access control (RBAC) to ensure operational security and data segregation.

Role ID	Role Name	System Access Scope	Key Responsibilities
Role 1	Super Admin	Full System Access	System setup, Roles & Permissions, Branch & Franchise management, Tariff Matrix, API Partner integrations, Wallet approvals, Master Settings, Audit logs.
Role 2	Branch Admin	Branch-Level Access	Managing branch customers, approving wallet load requests, monitoring branch shipments, reviewing branch tracking idle reports.
Role 3	Franchise Operator	Franchise-Level Access	Booking shipments for franchise clients, managing sub-customers, wallet management, label printing.
Role 4	Customer / End-User	Customer Portal Access	View/Book personal shipments, upload KYC documents, submit wallet top-up requests, view statement of account, print invoices.
Guest	Public Tracking	Public Web Portal	Live AWB tracking search, view shipping rate matrix, view terms & conditions, contact support.

3. Public Web Portal & Guest Tracking

Guests and unauthenticated users can access the public frontend website to track parcels or calculate preliminary shipping costs.

3.1 Live Parcel Tracking

1. Navigate to the main application URL.
2. Locate the **Tracking Search Bar** on the homepage or navigation bar.
3. Enter your **Air Waybill Number (AWB)** or **Reference Number**.
4. Click **Track Shipment**.

- 5. View the complete shipment movement timeline, including transit checkpoints, current status stage, origin, destination, and expected delivery status.

3.2 Public Shipping Rate Calculator

- 1. Click **Price / Rate Matrix** in the top navigation.
- 2. Select the **Destination Country** and **Service Type** (Express, Standard, Cargo).
- 3. Enter the package dimensions (Length × Width × Height in cm) and gross weight (kg).
- 4. The system calculates **Volumetric Weight** using the formula:

Formula: Chargeable Volumetric Weight (kg) = (Length cm × Width cm × Height cm) / 5000

- 1. The system displays the chargeable weight (the higher value between actual gross weight and volumetric weight) and estimated shipping rates.

4. Customer Portal User Manual (Role: Customer)

4.1 Login & Dashboard Overview

- Access the panel via `/intl-panel/` or clicking **Login** on the website.
- Enter your registered email address/username and password.
- Upon login, the **Customer Dashboard** displays your active wallet balance, total booked shipments, KYC approval status, and recent activity logs.

+-----+			
CUSTOMER DASHBOARD			
+-----+-----+-----+-----+			
Wallet Balance	Active Bookings	KYC Status	Pending Req
\$1,450.00	12 Shipments	VERIFIED (Green)	0 Requests
+-----+-----+-----+-----+			

4.2 KYC Document Submission Workflow

To comply with international customs regulations, all senders must complete KYC verification before shipping international parcels.

1. Click **Upload KYC Docs** in the left sidebar navigation (`/customer/kyc`).

2. Fill out identity numbers:

- **Aadhaar Number** (12-digit format)
- **PAN Number / Passport Number**
- **GST Number / Company Registration Number** (for business accounts)

1. Upload supporting proof files (accepted formats: PDF, PNG, JPG; max 5MB):

- **ID Proof File:** Government issued photo ID.
- **Address Proof File:** Utility bill, bank statement, or passport copy.

1. Click **Submit KYC Application**.

2. *Note:* Status will show **Pending Verification**. Once approved by Admin, status updates to **Verified**. If rejected, feedback will be provided for re-upload.

4.3 Wallet Ledger & Funds Recharge

All customer bookings are settled against a prepaid wallet balance.

A. Checking Wallet Balance & Ledger History

1. Navigate to **My Wallet Balance** (`/customer/wallet`).
2. Review the top stats card showing **Available Balance**.
3. View the **Transaction Ledger Table**:

- **Credit (+):** Approved wallet recharges.
- **Debit (-):** Deductions for completed shipment bookings.
- **Running Balance:** Real-time remaining ledger total.

B. Submitting a Wallet Top-Up Request

1. On the Wallet page, click **Add Funds / Request Top-Up**.
2. Enter the **Recharge Amount** (e.g., \$500).
3. Select the **Payment Mode** (Bank Transfer, UPI, Wire Transfer, Cash Deposit).
4. Enter the **Transaction Ref ID / UTR Number**.
5. Upload payment receipt screenshot/PDF (**Proof File**).
6. Click **Submit Load Request**.

7. The request enters **Pending** status. Once Branch/Super Admin verifies the transaction, funds are credited immediately to your balance.
-

4.4 Booking an International Shipment

1. Navigate to **Shipment Bookings** → **Create New Booking** (`/shipments/book`).

2. Step 1: Sender & Receiver Details

- Select or add **Sender Information** (Name, Phone, Address, Pincode, City, Country).
- Enter **Receiver Information** (Destination Country, Full Name, Contact Number, Full Delivery Address, Postal Code).

1. Step 2: Package Specifications & Dimensions

- Select **Service Type** (e.g., International Express, Economy, Document, Non-Document).
- Select **Courier Partner Preference** (e.g., DHL, FedEx, Aramex, Self-Network).
- Enter package count. For multi-box shipments, enter **Length, Width, Height, and Weight** for each box.
- The system automatically calculates total actual weight vs. total volumetric weight and flags the **Chargeable Weight**.

1. Step 3: Itemized Commodity & Customs Invoice Details

- List each item inside the package: Description, Quantity, Unit Price, Total Value, Harmonized System (HS) Code (if known).
- System checks for **Restricted Items** (e.g., flammable liquids, perishable items, lithium batteries) and displays warnings if matched.

1. Step 4: Rate Calculation & Wallet Deduction

- Click **Calculate Charges**.
- Review breakdown: Freight Charge + Fuel Surcharge + Handling Fee + GST/Tax = Total Shipping Cost.
- Ensure wallet balance is sufficient.

1. Step 5: Final Submission & Label Generation

- Click **Confirm & Book Shipment**.
 - The wallet is debited automatically, and an **AWB Number** is generated instantly.
-

4.5 Printing Shipping Documents

From the **My Shipments** table (`/shipments`):

- **Print AWB Label:** Generates a standard thermal shipping label with scannable barcode, consignee address, and routing codes.
 - **Print Commercial Invoice:** Generates customs commercial invoice with itemized values for export clearance.
 - **Print Packing List / Customs Declaration:** Generates mandatory manifest document for international border checks.
-

5. Franchise Operator & Branch Admin Manual (Roles 2 & 3)

5.1 Onboarding & Managing Branch Customers

1. Go to **Customers** (`/customers`).
2. Click **Add New Customer**.
3. Fill in name, email, contact phone, branch assignment, and initial credit limits.
4. An automated welcome email with login credentials can be sent directly to the customer.

5.2 Reviewing & Approving Wallet Load Requests (Branch Admin)

1. Go to **Wallet Load Requests** (`/customer/wallet-requests`).
2. Filter by status: **Pending**.
3. Inspect request details: Customer Name, Requested Amount, Payment Mode, UTR Number.
4. Click **View Proof** to inspect the uploaded bank receipt image/PDF.
5. Action options:
 - **Approve:** Automatically credits customer wallet and logs financial transaction.
 - **Reject:** Prompts for a rejection reason (e.g., "Invalid UTR", "Payment not received in bank account").

5.3 Customer KYC Verification & Review

1. Navigate to **KYC Requests** (`/kyc-requests`).
 2. Click **Review Application** next to pending customers.
 3. Verify uploaded ID Proof and Address Proof against recorded Aadhaar/Passport numbers.
 4. Click **Approve KYC** to mark customer compliant, or **Reject KYC** with remarks to request re-upload.
-

6. Super Administrator Guide (Role 1)

Super Administrators possess full system privileges to manage master tables, dynamic shipping rate matrices, system roles, and infrastructure settings.

6.1 Roles & Permissions Control (`/roles`)

- Define custom user roles and toggle module access rights (Create, Read, Update, Delete) for different administrative staff.

6.2 Branch & Franchise Setup (`/branches` & `/franchises`)

- Create new physical branch offices and assign Branch Managers.
- Manage franchise commission structures, branch codes, and location mapping.

6.3 Destination Countries & Zone Mapping (`/countries`)

- Configure operating origin and destination countries.
- Map countries into tariff pricing zones (e.g., Zone A: USA/Canada, Zone B: EU/UK, Zone C: Asia-Pacific).

6.4 Courier Partner Integration (`/partners`)

- Register vendor shipping partners (DHL, FedEx, Aramex, Self Network).
- Configure partner API endpoints, account credentials, tracking URL masks, and service code mappings.

6.5 Shipping Rates Matrix Engine (`/rates`)

The rate engine computes prices based on weight ranges and destination zones.

1. Navigate to **Master Settings** → **Shipping Rates Matrix**.
2. Click **Add Rate Slab**.
3. Parameters to define:

- **Service Type:** (e.g., Express Premium)
- **Destination Zone / Country**
- **Weight Min (kg)** and **Weight Max (kg)** (e.g., 0.5kg to 1.0kg)
- **Base Rate (\$)**
- **Additional Per KG Rate (\$)**
- **Fuel Surcharge (%)**
- **GST / Tax (%)**

1. Click **Save Rate Rule**.

6.6 Movement Status Stages (`/movement-stages`)

Configure tracking milestones used across shipment lifecycles:

- Stage 1: Shipment Booked / Manifest Created
- Stage 2: Picked Up / Received at Hub
- Stage 3: Outward Customs Cleared
- Stage 4: In Transit / On Board Flight
- Stage 5: Import Customs Clearance
- Stage 6: Out for Delivery
- Stage 7: Delivered (Signature Captured)
- Stage 8: Exception / Hold / Delayed

6.7 Application Settings & Notifications (`/app-settings`)

- Configure company identity details (Company Name, Logo URL, Currency Symbol, Support Email/Phone).
- API keys for automated alerts: **SMS Gateways**, **WhatsApp API Credentials**, and **SMTP Email Settings**.
- Inspect **Notification Logs** (`/notification-logs`) to monitor sent messages and debug delivery failures.

7. Standard Operating Procedures (SOPs)

SOP 1: Complete End-to-End Shipment Booking Lifecycle

Process Workflow Diagram

1 Customer / Staff Logs In

2 Check Wallet Balance

3 Enter Sender & Receiver Info

4 Enter Dimensions & Weight

5 System Computes Chargeable Volumetric Weight

6 Itemized Customs Commodity Input

7 Restricted Goods Verification

8 Debit Wallet & Generate AWB Barcode

9 Print Label & Update Tracking Milestones

SOP 2: Managing Tracking Exceptions & Stalled Parcels

1. Go to **Reports** → **Tracking Idle Report** (`/reports/tracking\_idle`).
2. System flags shipments with no status updates for over **48 hours**.
3. Click on the AWB number to inspect current location and vendor tracking response.
4. Click **Add Tracking Stage** (`/shipment/add\_tracking\_stage`).

5. Select updated stage (e.g., "Customs Hold - Document Required"), enter location remark, and notify consignee via SMS/Email alert.
-

8. Troubleshooting & Frequently Asked Questions (FAQ)

Q1: Why is the shipping price higher than expected based on scale weight?

Answer: International air freight charges are calculated based on **Chargeable Weight**, which is the greater of actual gross scale weight and **Volumetric Weight** ($\text{\$L} \times \text{W} \times \text{H} / 5000\text{\$}$). Large lightweight boxes occupy air cargo volume and incur volumetric charges.

Q2: Why is my KYC status still "Pending"?

Answer: KYC verification is manually reviewed by Branch/Super Administrators to ensure document authenticity. Reviews are typically completed within 2–4 business hours. Ensure uploaded documents are clear and uncropped.

Q3: My barcode label is printing small or blurry on my thermal printer.

Answer: Ensure your printer settings are set to **4×6 inches (100×150mm)** label stock with **100% Scale** (no fit-to-page margins). Use browser print preview to select thermal label size before sending to print.

Q4: What happens if a shipment booking fails due to low wallet balance?

Answer: The system will block booking creation and alert the user. Submit a wallet recharge request via `/customer/wallet` with proof of payment. Once approved by Admin, proceed to complete your booking.

9. Appendix: Support & Maintenance

- **Technical Support Contact:** Support Email & Phone as configured in App Settings.
 - **Document Version:** v2.4 (International ERP Edition)
 - **System Requirements:** Google Chrome, Mozilla Firefox, or Microsoft Edge (Latest versions recommended). Thermal barcode printers supported (Zebra, TSC, Xprinter, etc.).
-
